

# Human Risk Management (HRM)

Reduce the risk of a costly user-related data breach and demonstrate your efforts in compliance through measurable employee human risk management programmes.

## Humans are targets

36% of successful data breaches involve phishing

## Humans make mistakes

90% of successful data breaches involve human error

## Compliance is essential

Key standards like ISO 27001 require regular staff training

## Make employees your first line of defence

### ✓ Security Awareness Training

Assess and strengthen each user's security knowledge gaps through regular, bite-sized training courses that are prioritised based on their risk areas.

### ✓ Simulated Phishing

Identify which employees are susceptible to sophisticated and common phishing attacks through periodic simulations, and educate those who show high risk.

### ✓ Dark Web Monitoring

Safeguard exposed user accounts that could be used to launch targeted attacks by monitoring the dark web for stolen credentials (such as passwords).

### ✓ Policy Management

Keep users well-versed on security policies and procedures by requesting and tracking eSignature approvals from a pre-loaded library of core documents.

- ✓ **Drive security awareness** with user tailored training programmes
- ✓ **Dig deep into ongoing human risk** with training, phishing and policy reporting
- ✓ **Save time** with readily-made courses, phishing templates and policy docs

- ✓ **Demonstrate compliance** with key standards like ISO 27001 and GDPR
- ✓ **Understand your business's employee security posture** with a human risk score
- ✓ **Simple setup, fast deployment and automated** staff training reminders
